FOR IMMEDIATE RELEASE

Saint Louis, MO/March 31 — Imagine living up to a legacy that no one can remember. **Sky Girl and the Superheroic Legacy**, a new young adult novel from Joe Sergi, tells the story of DeDe Christopher, an ordinary teenager with an extraordinary destiny. After she develops the powers of a fictional superhero, DeDe must deal with capes, apes, and aliens to find a way to live up to a legacy that no one can remember and become Sky Girl.

Sergi wrote **Sky Girl and the Superheroic Legacy** for his young daughter, Elizabeth. Sergi explains, "As a comic fan, I wanted to bring my daughter into my world. As a father, I wanted a strong role model for her. Sky Girl presents both." Megan Sherrier, Teach for America Corps Member, '08, agrees, "Sky Girl presents a great message with positive role models that are accessible to students. I would gladly give Sky Girl to any one of my middle school students." But the story goes beyond a positive message. Michael Schwartz, Creator of the webcomic Oceanverse, says, "Sky Girl flies off the page with an exuberance that is somewhat lacking in today's young adult fiction. Joe Sergi has crafted a tale that is sure to strike a chord with all those who have adventure in their heart." And Shawn Pryor, Founder, PKD Media, says that the novel possesses "classic comic book storytelling that pushes the envelope of fantasy & tradition with lavish characters, plot twists and a good literary use of applying a MacGuffin to a story."
